Subject: Removal Action Work Plan for Ponds 16S and 18A

Greg:

Pursuant to your dated February 21, 2013 regarding Required Gas Extraction and Treatment at RCRA Ponds 16S and 18A; CERCLA Unilateral Administrative Order for Removal Action, Docket No. CERCLA 10-20100170 ("UAO," effective July 12, 2010), EPA required FMC to prepare Readily Implementable Interim Work Plans (IWPs) for gas extraction and treatment at Ponds 16S and 18A and, within 30 days after approval of IWPs, submit a Removal Action Work Plan for longer term operation of gas extraction and treatment at Ponds 16S and 18A.

FMC submitted the required IWPs on March 8, 2013. In a letter dated April 16, 2013, EPA approved the IWPs for Ponds 16S and 18A, with the condition that the cessation of gas extraction at a particular pond would be preceded by measurements at all standpipes associated with that pond for two consecutive months. EPA's April 16, 2013 letter also directed FMC to commence implementation of the approved IWPs for Pond 16S and Pond 18A within 48 hours of receipt. FMC's letter dated April 18, 2013 notified EPA that gas extraction and treatment commenced on April 18, 2013

pursuant to the EPA-approved IWPs. The attached Removal Action Work Plan for Ponds 16S and 18A (RAWP) is being submitted within 30 days of EPA's April 16, 2013 approval of the IWPs. Due to file size, the RAWP and Appendix A-6 are attached to this email. Appendix A-7 will be attached to a second email.
